

ZOOM WITH FAMILY AND FRIENDS

The ideal way to become comfortable with Zoom and make use of the various available options available is to download the free version. You not only can learn and try the functions that you would use during the Men's Club meeting such as moving between Gallery View and Speaker View, sending a question to our speaker through Chat, muting and unmuting and turning your video on and off but some of the more sophisticated options. You will be able to arrange a get together with family and friends in no time or set up a "Table" for an informal chat with five or six other members before our regular Tuesday meeting.

Here's how:

Go to zoom.us

Click Plans and Pricing

Click Sign up, its free

Enter your birth date

It will ask for your work email but you can enter your personal email

Go to your email and open the email from Zoom and click activate

Enter your name and create a password

You are next given the option to invite a friend or skip

Close the window

Go to the app and start a meeting and experiment on your own. Your login will be the email you used and the password you created

There are 100s of youtube videos that you can watch to learn how to use zoom.
